

2006 Conference

MAY 12-15, 2006

WELCOME TO ST. PETE BEACH, FLORIDA

THE SYNTONICS BASIC COURSE

Learn procedures for evaluating, monitoring and prescribing ocular phototherapy to rebalance and rehabilitate neuro-ocular conditions and vision-related learning/attention problems. And, for first-time O.D.'S: Thinking Syntonically for Beginners by Dr.'s Hancock & Van Hoy.

BASIC COURSE FOR COUNSELORS, PSYCHOTHERAPISTS, OTs, PTs, & TEACHERS

A 3-hour course for non-O.D.s presented by Alice Nixon, LCSW, BCD, and Monica Byrne O'Malley, RN, Dip. Psych. Attendees will learn how to immediately apply Syntonic Phototherapy in their work.

ADVANCED SYNTONICS COURSE

Presents Syntonic procedures to enhance therapeutic outcomes for an expanding range of conditions. An international group of speakers will discuss: a standardized pupil recording protocol; how syntonics improves visual fields in ADD/ADHD and lowers IOP in Glaucoma, how syntonics is used with therapy lenses and vision training to induce EEG Alpha for increased learning. Learn how to use Colorpuncture to treat sleep, emotional, learning and myopia problems of children. Hear how Modern European photobiology shifted the light healing paradigm from mystical lore to scientific fact. We will learn to think outside current medical models to rediscover the natural intelligence of our intrinsic light body. And we'll see how photographic imaging in a Bioluminal field provides a new tool to measure toxic influences and positive healing.

A VOYAGE INSIDE A RAINBOW

Alain Martel, M.SC

An offering by Canadian physicist and artist, Alain Martel, originator of the Sensora, a therapeutic device merging light, sound and movement with the flow of brainwaves, breath and heartbeat. Experience your heart, breath and brain spontaneously pulsate, undulate and harmonize for lasting energy, balance and profound inner-peace.

THURSDAY MAY 4, 2006 9:00 AM,
OPENING & START OF BASIC COURSE

WELCOME: HISTORY OF COLOR THERAPY & SYNTONIC THEORY

Larry Wallace, O.D., FCSO, President CSO
Ray Gottlieb, O.D., Ph.D. FCSO Dean CSO

Presentation covers history of the therapeutic application of light and color and the scientific and theoretical background of syntonic phototherapy.

SYNTONIC TESTING, DIAGNOSIS AND TREATMENT

Cathy Stern, O.D., FCSO, Vice President CSO

Patient history, symptoms, ocular motility, pupils, analytical data, visual fields, treatment protocols, filters, case management, goals & prognosis.

SYNTONIC SYNDROMES AND CASE HISTORIES

Rob Fox, O.D., FCSO, CSO Board of Directors

Review of typical basic cases including symptoms, eye and health history, visual measures, filter prescribing, and outcome measurement.

SYNTONIC DIAGNOSTIC TESTING LAB

Mary VanHoy, O.D., FCSO, CSO Board of Directors

Betsy Hancock, O.D., M.S., FCSO

Learn three key tests: 1) alpha omega pupil, 2) Butts String, and 3) Functional visual field testing with color field suppression zones, blind-spots and scotomas. Measurement, assessment and determination of Syntonic prescription for new attendees.

PRACTICE MANAGEMENT AND MORE

Taught by Core Faculty

Hints on cold starting a syntonics practice and fitting syntonics into a busy practice, space requirements, staff training, documentation, billing, mentors, resources, equipment, patient communication, VT vs Syntonics

EXPLORING THE SPECTRUM- a film by John Ott

CASE HISTORY PRESENTATION Power point by Charles Butts

FRIDAY, MAY 4, 2006

THREE SIMULTANEOUS PRESENTATIONS

Syntonics for Non-OD's,

Syntonics Basic for first time O.D.'s,

Advanced Syntonics

SYNTONICS FOR THE NON-O.D.

Alice Nixon, LCSW, BCD
Monica Byrne O'Malley, RN, RM, D.Psych.

Use of the Syntonic approach in addressing light perception deficit in clients suffering from stress, anxiety, depression, PTSD, learning difficulties, sports and performance enhancement. Attendees will be able to immediately begin assessing, evaluating and administering Syntonics.

**BASIC SYNTONICS FOR FIRST TIME O.D.'S
THINKING SYNTONICALLY FOR BEGINNERS**

Betsy Hancock, O.D., M.S., FCSO
Mary VanHoy, OD, FCSO, Trustee

An in-depth review of the basic syntonic concepts, testing, diagnostic protocols and questions.

**ADVANCE COURSE
TOWARDS STANDARDIZED PUPIL MEASURES**

John Polaski, O.D., FSCO, Treasurer

Through video recordings, a pupil rating system will be proposed to objectively indicate pupil rebound due to autonomic fatigue and other variations of pupil response.

ALPHA STATES, V.T. & SYNTONICS

Ellis Edelman, O. D., FCSO, Trustee

The four major brain rhythms relate to perceptual states, visual-motor performance and emotional, social and and cognitive behaviors. Learn to train high alpha-low beta using selected syntonic, lens and vision therapy.

ADD & VISUAL FIELDS - SYNTONICS FOR GLAUCOMA

Don Barniske, O.D., FCSO, Trustee

Results of syntonics on color & frequency doubling fields of 10 children on medication for ADD/ADHD. Also, research shows that light treatments lower IOP in glaucoma patients.

SATURDAY, MAY 5, 2006 ADVANCED (cont.)

COLOR LIGHT AND INTRINSIC INTELLIGENCE

Nishant Mathews

Certain native qualities of our deep, intrinsic intelligence have dimmed or are altogether missing in modern life. Color light and creative intention can re-awaken us to these qualities.

LIGHT AND COLORS IN PEDIATRIC MEDICINE

Fausto Pagnamenta, M.D.

Presenting fundamentals of colorpuncture with audience practice using colored glass rods to gently light acupuncture points. This holistic and very efficient therapy works well for children with emotional, sleep, vision (myopia), and attention disorders. Fifty percent of young children diagnosed with sleep disorder had total, lasting recovery after just three, five-minute colorpuncture treatments.

300 YEARS OF MODERN EUROPEAN LIGHT THERAPY

Alexander Wunsch, MD

The discovery of the full light spectrum in the 18th Century shifted the mystical sense of the healing powers of sunlight to the modern science based photobiology and therapy. This lecture highlights these developments through the last three centuries leading to emerging light therapy paradigm.

BIOLUMANETICS AND THE BIOLIMINAL IMAGE

Carolyn A. Szutarski, D.C.

The Luminator, invented in the 1970's to balance air temperature for efficient heating, brought not only lower heating costs but also a sense of well-being and led to 'Bioluminal Image Photography.' The Bioluminal Image appears out of focus or disordered due to illness or toxicity. Images of individuals responding to a therapeutic solution show a clear Bioluminal Image. Case studies will be presented.

SUNDAY, May 7, 2006

THE ADVANCED COURSE (cont.)

TOWARDS A TRUE LIGHT THERAPY.

Nishant Mathews

As we come to understand the principles of working directly with biological systems light energy, we learn to speak directly to our "body of light" in its own language. We will explore new possibilities for color light frequency patterns of therapy.

ADVANCES IN LIGHT AND PHOTOMEDICINE

Larry Wallace, O.D., FCSO, President CSO

Ray Gottlieb, O.D., Ph.D., FCSO, Dean CSO

Yearly review of exciting research supporting phototherapy and syntonics optometry.

AND FOR INDIVIDUAL USE EVERY DAY OF THE CONFERENCE

A VOYAGE INSIDE A RAINBOW

Alain Martel, M.Sc

An offering by Canadian physicist and artist, Alain Martel, originator of the Sensora, a therapeutic device merging light, sound and movement with the flow of brainwaves, breath and heartbeat.

Experience your heart, breath and brain spontaneously pulsate, undulate and harmonize for lasting energy, balance and profound inner-peace.
